

# SASCHA ANDEWEG

LINGUISTIC DATA ANALYST / FULL STACK WEB DEVELOPER / GRAPHIC DESIGNER /

Working in the printing business in The Netherlands has made me passionate about creating bespoke products for clients that I built long lasting working relationships with. Those 28 years of developing ideas, designing and producing material for print and web have given me great joy and priceless experience. After moving to Ireland with my family in 2016 a total career change gave me a boost in many ways. I was able to use my experience working in machine learning for a multinational. This has given me the confidence that after my recent graduation from the Code Institute and getting a level 6 diploma in **Full Stack Software Development** I can continue following my passion for developing, creating and exceeding client's expectations.
