Workshop Column writing
- 2016-present
Globetech Ltd
Linguistic Analyst/Modeler
on Apple projects
- 2019-'20
Full-stack software developer
Code Institute

PROJECTS

Globetech Ltd.:
Working on the linguistic side of machine learning and artificial intelligence.

TekstBeeld Groep:
Prepress specialist.
Graphic designer with a good knowledge of the digital and offset printing done in house.
Intensive interaction with a great variety of clients.
Trained in sales.
Since the early start of the internet I've been working on web design.

Starting in the late nineties up to the present day I have worked for a classical music festival (www.festival-zvl.nl) building the website, designing presentation material, program brochures, leaflets, and keeping all the digital assets together.

I have worked on local papers where my work involved creating adverts, doing the full layout, acquisition of advertisers, editing, sometimes writing editorial pieces and communication with the printers organizing the printing.

DJANGO

LOOKING AHEAD

Working with me will give you a listening ear, years of experience to assist you in reaching your goals, whether it's in graphic design or web design, and a Dutch no nonsense approach.

I'm training to be a full stack web developer, so this will add even more to the many possibilities in the near future.

Please don't hesitate to share your ideas with me and find out if we are a match.
